

*"The washunit that becomes a SPA station"*

**FLAMINGO TOTEM:** is a multifunctional column designed to be mounted on the side of the washbasin and provide the following services:

- hand shower and mixer integrated in the column in order to completely free up the space inside the sink and therefore have much more free space for the hairdresser's work.
- Integrated ozone generator. The ozonated water that comes out of the shower head makes hair softer and shinier.-
- Shirodara massage. the hairdresser can give a relaxing Shirodara massage to the client thanks to the bowl designed for essential oils and the position adjustment system.
- Music. a Bluetooth speaker allows the diffusion of relaxing music during treatments.

## HAND SHOWER AND MIXER TAP OUT FROM THE BASIN

The hand shower and the mixer are integrated into the column; the extractable shower head comes down from above and the hose has the right length to reach well under the customer's neck. once lowered, the hose remains in position to allow the hairdresser to complete the service even with the water turned on.

Once the service is finished, the hose retracts easily by accompanying it upwards.

## SINK FREE WITH MORE SPACE TO WORK

Moving the hand shower and mixer in the column allows you to mount a totally empty and free sink inside.

In this way the hairdresser has much more operating space even in the case of the client's very long hair.

the extra comfort of the free sink for the hairdresser is the added value of this new system.

# WHY THE OZONE?

ozone generator ozonates the mains water used to wash hair in hairdressing salons. Ozone is a gas with a high oxidizing power capable of sanitizing skin and hair. This gas is completely ecological as, after performing its oxidizing function, oxygen returns without leaving harmful residues. In addition to counteracting hair loss, ozone leaves hair softer and revives its color and shine. The use of ozonized water also allows you to reduce the amount of use of shampoo and conditioner.

BACTERIA

VIRUS

ODORS

The use of ozone is the simplest, most effective and ecological sanitization tool. it was recognized by the Ministry of Health as a "Natural aid for the sterilization of environments contaminated by bacteria, viruses, mould, mites etc., in July 1996 Prot.nr.24482

internationally it is recognized by FDS (2001) and USDA (2002) as a safe and effective protection.

the dispenser is already integrated into the column so no need for special installations, the washing must be connected normally. No particular maintenance.

VEZZOSI

# SHIRODARA MASSAGE

Shirodara is a thousand-year-old ritual of the Yurveda tradition which consists of a continuous flow of hot oil on the head which relaxes, nourishes the tissues and hydrates the hair, making it soft, shiny and full-bodied.

It gives a feeling of relaxation, tranquility and mental calm thanks to the addition of essential oils with an aromatic function. The constant flow of hot oil creates a light massage on the scalp, improves blood circulation, promotes the phase of relaxation and psychophysical rebalancing. the column is equipped with a hook for hanging the bowl to be filled with essential oils and a system for regulating the position of the bowl on the client's head

# MUSIC

an integrated Bluetooth speaker allows you to connect any multimedia device to play relaxing music during treatment.

# WASHUNITS COMPATIBILITY

Flamingo totem is compatible with the washunits listed.

possibility to adapt it also on other models upon verification.
